

Prolactinoma study

A call for all ENEA members around the world to participate

ENEA RESISTANT PROLACTINOMA STUDY

Contact

https://eneassoc.org/?page_id=1437

Purpose of study:

Epidemiology, clinical profile, and outcomes of patients with prolactinomas **taking a high dose cabergoline ($\geq 3\text{mg/week}$)**.

Methods:

- ✓ retrospective observational study;
- ✓ males/ females ≥ 18 years old with prolactinomas and cabergoline treatment at doses $\geq 3\text{ mg/week}$
- ✓ SYNERGY2GO platform

The screenshot shows a web browser window with the URL `synergy2go.com/new.php`. The page header includes a greeting "Hello, Krystallenia Alexandrakil" and navigation links: "Home", "My account", "My apps", and "Log out". The main content area features the "PROLACTINOMA" logo in large, bold letters. At the bottom, there is a navigation bar with links: "About study", "Data summary", "New patient" (which is underlined), and "Search patient".

Secondary end-points:

1. Better define resistant prolactinomas
2. Assessment of current management
3. Database on resistant prolactinomas
