ENEA Newsletter - April 2024

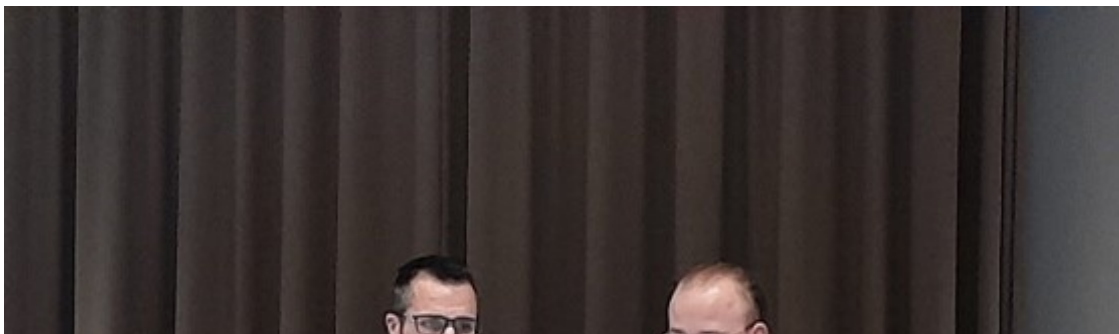

Dear member of the European NeuroEndocrine Association,
ENEAA April 2024 Newsletter is live (<https://www.enea.org>)

We shall try to maintain this information regularly throughout the year and we are happy to receive your news for ENEA to be included.

ENEAA 2023 workshop was a real gem for young neuroendocrinologists! They actively participated by sending 103 high-quality abstracts, we had 3 EYRC guided poster sessions, one EYRC oral communication session, and one EYRC symposium. Not to mention the EYRC networking event that had an impressive turnout this year!

We gladly awarded 20 travel grants and four prizes for the best clinical and basic oral communications and posters! The winners of this year's edition were: Dr Cihan Atila from Switzerland, Dr Alexia Grasso from Italy, Dr Dario De Alcubierre from Italy, and Dr Mirela-Diana Ilie from France.

ENEA 2023 workshop was also the occasion to renew the EYRC-EYES collaboration. We were happy that Dr Antoan Stefan Sojat, the EYES co-chair, accepted to co-moderate the EYRC oral communication session with Dr Giampaolo Trivellin, the EYRC coordinator.

Young neuroendocrinologists, we hope you have enjoyed as much as we did the ENEA 2023 Workshop and that you will join us in Seville, Spain, for the ENEA 2024 Congress! Dr Antonio Fuentes-Fayos and Dr Mirela-Diana Ilie, are already preparing an exciting program!

In the meantime, keep an eye on our EYRC Training Program on Youtube (@eyrc5735), the workshop was the perfect occasion for us at EYRC to record a couple of interviews that will be online soon!

You can also follow us on social media: Twitter (@ENEA_Young), Facebook (EYRC

You can also follow us on social media: Twitter (@ENEA_Young), Facebook (Eyrce Enea), and Instagram (@eneayoung)!

Dr. Mirela-Diana Ilie, EYRC board member and ENEA ExCo representative

On behalf of the Local Organising Committee, it is a pleasure to welcome you to the **21st Congress of the European Neuroendocrine Association (ENEA 2024)**, which this year will be held in Spain and, specifically, in the capital of Andalusia, Seville.

We would also like to thank the ENEA Board of Directors for choosing Seville as the host city for this congress, as well as the Programme Organising Committee, chaired by Giovanna Mantovani and Juan Pedro Martínez-Barberá, for their hard work in putting together an attractive and innovative scientific programme that will address all the most relevant new developments in the field of neuroendocrinology and future developments in this speciality.

The venue for this meeting will be the Barceló Convention Center, a space with an exceptionally suitable design for holding congresses, located on the banks of the Guadalquivir River and just a few minutes away from all the historical sites.

We invite you to enjoy both the scientific content of the meeting and the wonders of such a hospitable city as Seville, full of history and charm that we are sure you will thoroughly enjoy.

Seville swims between deep-rooted traditions and the awakening of a European and cosmopolitan city that welcomes all its visitors with open arms.

You are receiving this email because you signed up for our newsletter as an active member of ENEA.
