

Dr. Thomas Cuny (MD, PhD) is Professor of Endocrinology at Aix-Marseille University and Marseille University Hospitals, where he serves as Director of the Clinical Investigation Center (Inserm U1409) and Vice-President for Research within the Research Executive Board. His clinical and research activities focus on pituitary diseases, phosphocalcic diseases, and rare endocrine disorders.

Over the course of his career, he has combined clinical expertise, translational research, and institutional leadership, with more than 100 peer-reviewed publications and active involvement in national and European scientific initiatives. He currently serves in several strategic roles, including Deputy Secretary General of the French Society of Endocrinology and leadership responsibilities within European rare disease networks.

Committed to fostering collaboration, innovation, and excellence in endocrine research and patient care, he seeks to contribute actively to the ENEA Executive Committee by supporting scientific development, strengthening international partnerships, and promoting the next generation of endocrinology researchers and clinicians.
